

TLDR: Vendor APIs provide current content to power your websites

springshare

LibApps Accounts API
Photo & Pronouns
LibGuides API
General Guides, Course Guides, & Subject Guides

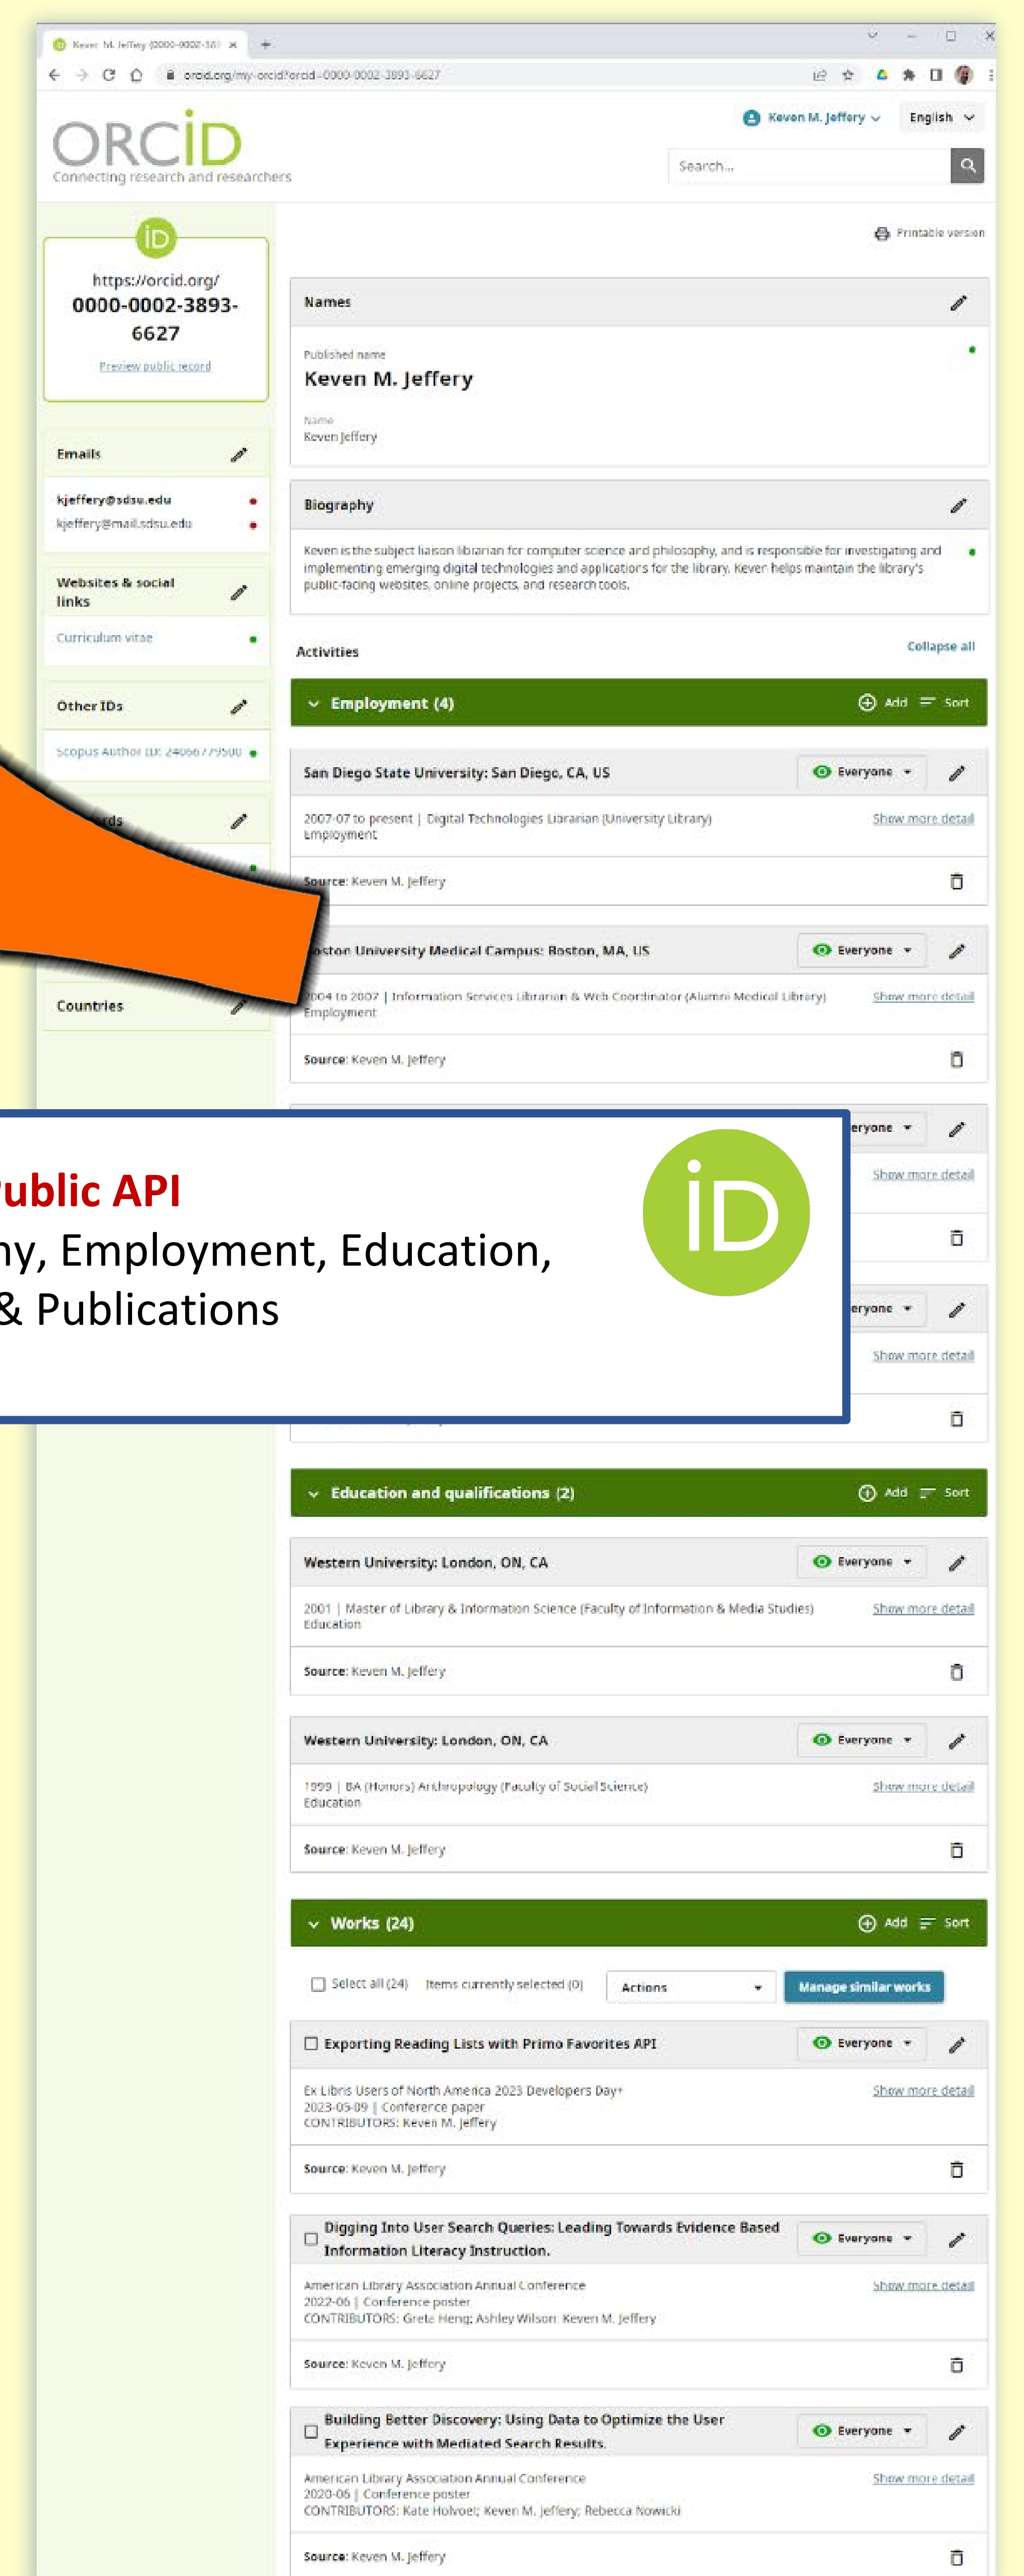

ExLibris Primo
USER JWT API
Authenticate Patron Request
Primo Favorites API
Saved Favorites, Labels, Title, Author, Book Covers

Local Database

Name, Title, Academic Rank, Contact Info, and...

ORCID ID
Connects to the ORCID Public API
LibApps ID
Connects to LibApps APIs
Primo Reading List ID
Retrieves a Reading List Created with Primo Favorites API

ORCID Public API
Biography, Employment, Education, Grants, & Publications

1 API Request
https://lgapi-us.libapps.com/1.1/accounts/47594?site_id=5352&key=893p5632e4

2 API JSON Response

```
{
  "id": 47594,
  "first_name": "Keven",
  "last_name": "Jeffery",
  "title": "Digital Technologies Librarian",
  "created": "2015-04-24 18:26:43",
  "updated": "2022-06-06 18:57:12",
  "pronouns": "he/him",
  "image": {
    "url": "\\libapps.s3.amazonaws.com/47594/40509/KevenPic.jpg"
  },
  "connect": {
    "phone": "(619) 594-3405",
    "email": "kjeffery@sdsu.edu"
  }
}
```

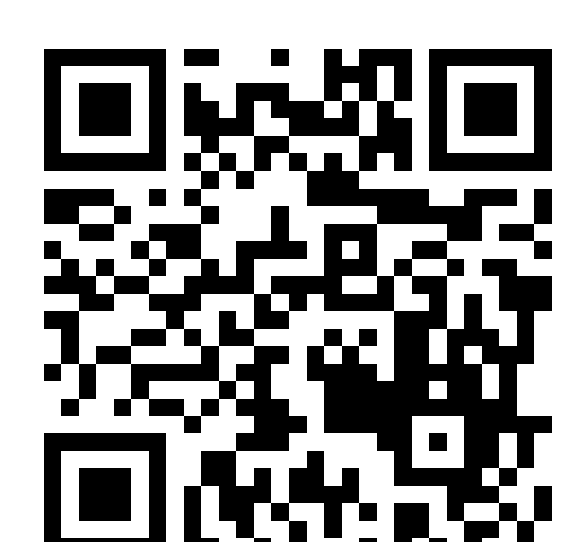

3 JSON Parsed with PHP

```
<?PHP
$json = file_get_contents($API_Request, false);
$data = json_decode($json, true);
$first = $data[0]['first_name'];
$last = $data[0]['last_name'];
$pronouns = $data[0]['pronouns'];
$photo = $data[0]['profile']['image']['url'];
echo '<br />';
echo $first.' ' . $last;
```
